Nakagawa N., Kamiya Y., Imaseki H.;

Nuclectide sequence of an auxin-regulated l-aminocyclopropane-1-
carboxylic acid synthase gene from Cucurbita maxima Duch.";

(In) Plant Gene Register PGR5-110.

-I- FUNCTION: CATALYZES THE FORMATION OF 1-AMINOCYCLOPROPANE-1-
CARBOXYLAR: A DIRECT PRECURSOR OF ETHYLENE IN HIGHER PLANTS.

-I- CATALYTIC ACTIVITY: S-adenosyl-L-methionine - 1-
aminocyclopropane-1-carboxylate + methylthioadenosine.

-I- COFACTOR: PYRIDOXAL PHOSPHATE.

-I- SUBUNIT: HOWODIMER.

-I- SUBUNIT: HOWODIMER.

-I- INDUCTION: BY TISSUE WOUNDING AND AUXIN.

AMINOTION: BY TISSUE WOUNDING TO CLASS-I OF PYRIDOXAL-PHOSPHATE-DEPENDENT.

Sequence 6, Application US/08724194

Patent No. 5848457

GENERAL INFORMATION:

APPLICANT: RANU, RAJINDER S.

TITLE OF INVENTION: ONE-AMINOCYCLOPROPANE-1-CARBOXYLATE

TITLE OF INVENTION: SYNTHASE GENES FROM PELARGONIUM TO CONTROL ETHYLENE LEVELS

TITLE OF INVENTION: IN GERANIUMS

NUMBER OF SEQUENCES: 13

CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      9

Patent No. 6207881
GENERAL INFORMATION:
APPLICANT: THEOLOGIS, ATHANASIOS
APPLICANT: SATO, TAKAHIDO
TITLE OF INVENTION: CONTROL OF FRUIT RIPENING THROUGH
TITLE OF INVENTION: GENETIC CONTROL OF ACC SYNTHASE SYNTHESIS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.25

Patent No. 6207881

GENERAL INFORMATION:
GAPPLICANT: THEOLOGIS, ATHANASIOS
APPLICANT: SATO, TAKAHIDO
TITLE OF INVENTION: CONTROL OF FRUIT RIPENING THROUGH
TITLE OF INVENTION: GENETIC CONTROL OF ACC SYNTHASE SYNTHESIS
NUMBER OF SEQUENCES: 34
CORRESPONDENCES: MORRESON & FORESTER
ADDRESSEE: MORRESON & FORESTER
STREET: 755 PAGE Mill Road
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Length 485;

Database

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                         Traminocyclopropane-1-carboxylate synthase (EC 4.4.1.14) - soybean C; Species: Glycine max (soybean)
C; Species: Glycine max (soybean)
C; Date: 22-Nov-1993 #sequence_revision 10-Nov-1995 #text_change 04-Feb-2000
C; Accession: S25002
R; Liu, D.; Li, N.; Mattoo, A.K.
submitted to the RMEL Data Library, June 1992
A; Description: Nucleotide sequence of soybean ACC synthase.
A; Reference number: S25002
A; Reference number: S25002
A; Reference number: S25002
A; Recession: S25002
A; Residues: 1-484 < LIU>
A; Cross-references: EMBL: X67100; NID:gl8557; PIDN:CAA47474.1; PID:gl8558
C; Superfamily: 1-aminocyclopropane-1-carboxylate synthase
C; Superfamily: 1-aminocyclopropane-1-carboxylate synthase
C; Superfamily: 1-aminocyclopropane-1-carboxylate synthase
C; Keywords: carbon-sulfur lyase; ethylene blosynthesis; phosphoprotein; pyridoxal p; 279/Binding site: pyridoxal phosphate (Lys) (covalent) #status predicted

1-aminocyclopropane-1-carboxylate synthase (EC 4.4.1.14) 2 - tomato
N.Alternate names: ACC synthase; S-adenosyl-L-methionine methylthioadenosine-lyase
C.Specias: Lycopersicon esculentum (tomato)
C.Specias: Lycopersicon (1991)
C.Specias: Lycopersicon (1992)
A.Fitle: 1-aminocyclopropane-1-carboxylate synthase in tomato is encoded by a multige
A.Feference number: S19677; MUID:92106331
A.Feciasion: S19677
A.Fociasion: S19678
A.Feciasion: S24358; MUID:92339529
A.Fitle: A functional tomato ACC synthase expressed in Escherichia coli demonstrates
A.Feciasion: S24358
A.Feciasi

  Sunako T., Ishikawa R., Senda M., Akada S., Niizeki M., Harada T.; "MdAGS-5A (Accession No. AB034992) and 5B (Accession No. AB034993), two wound-responsive genes encoding 1-aminocyclopropane-1-carboxylate synthase in apple. (PGR00-030)."; Plant Physiol. 122:620-620(2000).
-!- COFACTOR: PYRIDOXAL PHOSPHATE (BY SIMILARITY).
-!- SUBUNIT: HOWODIMER (BY SIMILARITY).
-!- MISCELLANBOUS: IN EUKARYOTES THERE ARE TWO ISOZYMES: A CYTOPLASMIC ONE AND A MITOCHONDRIAL ONE (BY SIMILARITY).
-!- SIMILARITY: BELOMGS TO CLASS-I OF PYRIDOXAL-PHOSPHATE-DEPENDENT AMINOTRANSFERASES.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          358

Oetiker J.H., Olson D.C., Shiu O.Y., Yang S.F.;

Submitted (FEB-1997) to the EMBL/GenBank/DDBJ databases.

-1- CATALYTIC ACTIVITY: S-ADENOSYL-L-METHIONINE = 1-

AMINOCYCLOPROPANE-1-CARBOXYLARE + METHYLMIOADENOSINE.

-1- COFACTOR: PYRIDOXAL PHOSPHATE (BY SIMILARITY).

-1- SUBUNIT: HOMODIMER (BY SIMILARITY).

-1- MISCELLANGOUS: IN BUKARYOTES THERE ARE TWO ISOZYMES: A CYTOPLASM ONE AND A MITOCHONDRIAL ONE (BY SIMILARITY).

-1- SIMILARITY: BELONGS TO CLASS-I OF PYRIDOXAL-PHOSPHATE-DEPENDENT
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Lycopersicon esculentum (Tomato).

Lee Y.K., Lee S.H.;

Submitted (APR-1998) to the EMBL/GenBank/DDBJ databases.

-!- COFACTOR: PYRIDOXAL PHOSPHATE (BY SIMILARITY).

-!- SUBUNIT: HOMODIMER (BY SIMILARITY).

-!- MISCELLANEOUS: IN EUKARYOTES THERE ARE TWO ISOZYMES: A CYTOPLASMIC ONE AND A MITOCHONDRIAL ONE (BY SIMILARITY).

-!- SIMILARITY: BELONGS TO CLASS-I OF PYRIDOXAL-PHOSPHATE-DEPENDENT AMINOTRANSFERASES.

For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster genome using these BACs. For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster BAC library was prepared by Kazutoyo Osoegawa and Aaron Mammoser in Pieter de Jong's laboratory in the Department of Cancer Genetics at the Roswell Park Cancer Institute in Buffalo, NY. The library is named RPCI-98 and was constructed by partial EcoRI digestion of Drosophila DNA provided by the BDGP from the isogenic strain v2: nbw sp, the same strain used for the BDGP's PI and EST libraries. A more detailed description of the library and how to order individual BAC clones, the entire library, or filters for hybridization from the BACPAC Resource Center can be found at http://bacpac.med.buffalo.edu/drosophila_bac.htm. Determination of this BAC-end sequence was carried out as part of collaboration with the Berkeley Drosophila Genome Project (BDGP). The BDGP is constructing a physical map of the Drosophila melanogaster genome using these BACs. For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster BAC library was prepared by Kazutoyo Osoegawa and Aaron Mammoser in Pieter de Jong's laboratory in the Department of Cancer Genetics at the Roswell Park Cancer Institute in Buffalo, NY. The library is named RPCI-98 and was constructed by partial EcoRI digestion of Drosophila DNA provided by the BDGP from the 1sogenic strain y2; cn bw sp, the same strain used for the BDGP's pl and EST libraries. A more detailed description of the library and how to order individual BAC clones, the entire library, or filters for hybridization from the BACPAC Resource Center can be found at http://Dacpac.med.buffalo.edu/drosophila_bac.htm.

Five-day old seedling shoots were then harvested, total RNA was prepared, poly(A) RNA was purified, one primary unamplified cDNA library was made, and 1 million pfu were in vivo excised to give paluescript SK(·) cDNA phagemids. These steps were performed in the TJ Close laboratory at the University of California, Riverside (Choi, Close, Fenton). Phagemids were plated and picked at the Clemson University Genomics Institute (CUGI) (Begum, Palmer, Frisch, Atkins and Wing). Plasmid DNA preparations, DNA sequencing and sequence analysis were performed at CUGI (Wing, Yu, Frisch, Henry, Simmons, Oates , Rambo, Main). The sequence has been trimmed to remove vector sequence and contains a minimum of 100 bases of phreparation and sequence analysis see

Determination of this BAC-end sequence was carried out as part of a collaboration with the Berkeley Drosophila Genome Project (BDGP). The BDGP is constructing a physical map of the Drosophila melanogaster genome using these BACs. For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster BAC library was prepared by Kazutcyo Osocgawa and Aaron Mammoser in Pieter de Jong's laboratory in the Department of Cancer Genetics at the Roswell Park Cancer Institute in Buffalo, NY. The library is named RPCI-98 and was constructed by partial EcoRI digestion of Drosophila DNA provided by the BDGP from the isogenic strain y2: n bw sp, the same strain used for the BDGP's pland EST libraries. A more detailed description of the library produced by the Labrary pland Experience of the library produced by the same strain used for the BDGP.

Determination of this BAC-end sequence was carried out as part of a collaboration with the Berkeley Drosophila Genome Project (BDGP). The BDGP is constructing a physical map of the Drosophila melanogaster genome using these BACs. For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster BAC library was prepared by Kazutoyo Osoegawa and Aaron Mammoser in Pieter de Jong's laboratory in the Department of Cancer Genetics at the Roswall Park Cancer Institute in Buffalo, NY. The library is named RPCI-98 and was constructed by partial EcoRI digestion of Drosophila DNA provided by the BDGP from the BDGP's and how to order Individual BAC clones, the entire library, or filters for hybridization from the BACPAC Resource Center can be found at http://bacpac.med.buffalo.edu/drosophila_bac.htm.
